

# **ALPHA MARINE ENGINES**

## 20, 30, 40, 55 TURBO

Variable speed; maximum power at flywheel at 3000 r/min: 14.9—41.0 kW; 20-55 bhp

## DURABLE, ECONOMICAL LIQUID COOLED MARINE DIESEL ENGINES

## SUITABLE FOR:

- small offshore boats and work boats
- pleasure boats and hire fleets
- propulsion or auxiliary applications

## **BASIC ENGINE CHARACTERISTICS**

- 2, 3 or 4 cylinders
- raw water heat-exchanger cooling
- direct or indirect injection
- naturally aspirated or turbocharged
- durable, economical and reliable
- low fuel consumption
- long service periods

## **DESIGN FEATURES AND EQUIPMENT**

- · heat exchanger
- water cooled exhaust manifold
- raw water pump
- fuel filter/agglomerator
- self-bleed fuel system with fuel lift pump
- individual fuel injection pump for each cylinder
- high level oil filler and dipstick
- raw water cooling system pump
- operators' handbook

## **OPTIONAL ITEMS**

A range of options enables your engine to be built to your exact needs:

• 12 volt starter motor (insulated earth return)

## ALPHA MARINE ENGINE

- 55 amp alternator
- range of gearboxes
- choice of air cleaners
- high level bearers
- start panels
- drive adaptors
- high output alternator
- wiring loom
- protection systems
- anti-vibration mountings
- sump lubricating oil drain pump
- paint colour

POWER OUTPUTS <sup>1</sup>

1. Powers, measured at flywheel, are for variable speed builds. Fixed speed builds also available.

#### Key to Emissions Compliance

EU Stage 3A only	
EU Stage 3A, USA EPA Interim Tier 4	

## **RATING DEFINITIONS, TO ISO 3046**

ISO Standard Conditions		
Barometric pressure	100 kPa	
Relative humidity 30%		
Ambient temperature at air in	let manifold	25°C

#### 1. Fixed speed power: continuous power (ICN)

The power in kW which the engine is capable of delivering continuously at the stated crankshaft speed, under ISO standard conditions, measured at the flywheel without power-absorbing accessories, provided that the engine is overhauled and maintained in good operating condition and that fuel to BS EN 590 Class A1 or A2, and lubricating oils to the correct performance specification and viscosity classification as recommended by Lister Petter Limited, are used.

#### 2. Fixed speed power: overload power (ICXN)

The maximum power in kW which the engine is capable of delivering intermittently at the stated crankshaft speed for a period not exceeding one hour in any period of twelve hours' continuous running, immediately after working at the continuous power, under ISO standard conditions and with the provisions specified in (1) above.

TORQUE							
Model	20	30	40	55			
r/min	1800	1800	1800	2000			
Nm	53	80	106	155			

#### 3. Variable speed: fuel-stop power, continuous power (IFN)

The maximum power in kW which an engine is capable of delivering continuously at stated crankshaft speed, under ISO standard conditions and with the provisions specified in (1) above, with the fuel limited so that the fuel stop power cannot be exceeded.

#### 4. Variable speed: fuel-stop power, intermittent power (IOFN)

The maximum power in kW which an engine is capable of delivering intermittently at the stated crankshaft speed, for a period not exceeding one hour in any period of twelve hours' continuous running, with the fuel limited so that the fuel stop power cannot be exceeded, immediately after running at the rating in (3) above, under ISO standard conditions and with the provisions specified in (1) above.

#### 5. De-rating

For non-standard site conditions, reference should be made to relevant BS, ISO and DIN standards. The overload capability applies to a fully run-in engine. This is normally attained after a running period of about 50 hours.

## ALPHA SERIES: ALPHA MARINE ENGINES TECHNICAL DATA SHEET

TECHNICAL DATA							
Model	20	30	40	55 T
